Description of the task:
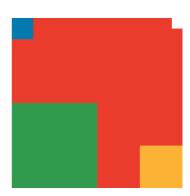

What fraction of the area of the basic element triangle are the areas of the small blue, the medium yellow, and the large green triangles? Solve this task in the case of the basic element square as well. Do you get the same results in both cases? Give the results in percentages as well. Write your solutions in the table below in percentages.

Solution(s) of the task:

	Blue part	Yellow part	Green part	Red part
Square				
Triangle				

Remarks / Self-evaluation:
