 PUSE Task Number  
**A**  
**307**

**Description of the task:**

We can assign a series of letters, so-called codes to the basic elements of the Poly-Universe sets. We used the letters of the shapes and colours to name the elements. Which letter should we add to the code of the basic elements so that the elements in one group belong to the same set?

Colours: **G-GREEN; B-BLUE; R-RED; Y-YELLOW**

Sets: **C-circle, S-square, T-triangle**

Examples:

**CBGRY**

**SRBYG**

**TGYBR**

**Solution(s) of the task:**

How many elements are there in each (triangle, square, or circle) set? \_\_\_\_\_

Write this number split according to the different base colours: \_\_\_\_\_

Write it as a multiplication. \_\_\_\_\_
